

GRANDE BUTT FUSION WELDING MACHINE

GBW40-160

GBW40-160 Butt Fusion Welding Machine is used for butt welding of plastic pipes, fittings made of PE,PP, PVDF and also used to install drainage system in building.

Features:

- ✓ Specially designed clamps according to features in structure and dimension of fitting indrainage system.
- ✓ Removable PTFE coated heating plate with high accurate temperature control system.
- ✓ Electrical planing tool with safety limit switch enables it to be started only when it is locked in operation position.
- ✓ Mechanical lock to maintain welding pressure.
- ✓ Spring manometer provides correct welding pressure.
- ✓ Pivoting planing tool and heating plate bring convenience to placing and removing.

Specifications:

| | |
|--------------------------------|--------------|
| Model | GBW40-160 |
| Pipe Size (mm) | 40 - 160 |
| Total Power (KW) | 2.55 |
| Working Voltage (V) | 220 |
| Heating Plate Max Temp (°C) | 270 |
| Overall Weight of Machine (KG) | 72 |
| Packing Size (L x W x H) cm | 59 x 49 x 88 |
